P. JOSEPH PERARO
COMMISSIONER

2/4/85 S/235-1 A
January 1985

Connecticut ended 1984 with record high employment, weekly wages and personal income and a seasonal unemployment increase, State Labor Commissioner P. Joseph Peraro reports.

Employment, Wages & Hours: Nonfarm employment increased to a record level of 1,528,200 (page 2), up 12,700 from November and 43,600 above December 1983. Jobs in manufacturing (418,500) showed a slight monthly gain of 600 and an increase of 7,800 from the year before. Nonmanufacturing employment at 1,109,700 reflected monthly and yearly increases of 12,100 and 35,800 respectively. Seasonal factors were largely responsible for a monthly decline in construction employment as well as increases in wholesale and retail trade which were all higher than a year earlier. Compared with December 1983, employment expanded in all nonmanufacturing categories and most areas of manufacturing. Thirteen labor market areas experienced growth in employment from November and three had declines (pages 5 & 6).

Average weekly earnings of factory production workers reached a new high of \$404.03 with hourly rates at a record \$9.44 for a 42.8-hour week, up from \$400.61 and \$9.36 in November and \$384.20 and \$9.04 a year earlier (page 3). Straight-time, 40-hour earnings for December were \$8.97 an hour or \$358.80 weekly, an increase from November's \$8.89 and \$355.60 and 4.2 percent above hourly and weekly pay rates in December 1983. Workers in the New London/Norwich area received the highest weekly wage, \$442.02, followed by Hartford, Ansonia, Bristol, Bridgeport and New Britain (page 6).

Unemployment: The number of unemployed workers in December was estimated at 79,300 or 4.7 percent of the labor force, up from 74,100 and 4.4 percent in November (page 4). The seasonally adjusted rate moved from November's 4.6 to 4.8 last month which compared with 5.1 percent a year ago. Both the actual and seasonally adjusted Connecticut rates for December remained well below the respective national figures of 7 and 7.2 percent. Unemployment rates increased in 10 labor market areas, dropped in three and were unchanged in three. Included in the unemployment estimate are people receiving unemployment benefits, those ineligible or whose benefits expired, others entering or reentering the labor force and workers who were not entitled to wages during temporary seasonal shutdowns. There were an estimated 23,100 persons filing continued claims for unemployment benefits in December, about 4,900 fewer than the year before.

Other Indicators: Other seasonally adjusted economic indicators (page 7) were mixed in December, with personal income of state residents once again registering an all-time high and manufacturing output at a higher level than in November and the year before, in addition to increased employment.

BRIEF EXPLANATION OF THE CPI-The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. It is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day to day living. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing a new CPI for all Urban Consumers which covers approximately 80 percent of the total noninstitutional civilian population. It includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force. The CPI shown above represents U.S. city averages and is not seasonally adjusted.

THERE IS NO SEPARATE CONSUMER PRICE INDEX FOR CONNECTICUT OR ANY AREA WITHIN THE STATE.

Stamford	389.66	392.30	360.80	43.2	43.3	41.0	9.02	9.06	8.80
Torrington	296.12	306.25	283.85	40.9	42.3	40.9	7.24	7.24	6.94
Waterbury	357.86	355.37	333.25	44.4	44.7	43.0	8.06	7.95	7.75
Willimantic	365.88	330.66	321.08	43.3	39.6	39.3	8.45	8.35	8.17

Note: The averages shown above are influenced by the occupational composition of the area and so not necessarily represent differences between areas in pay for the same occupations. While the labor market areas take their names from the major cities, the averages are those for all the towns within the area.
